Why not use RDA in historical databases?

- Own standards and cataloguing tradition

- No data exchange

- RDA: too complex and too many rules

- „Core RDA"

Alignments and cross-references between RDA and other standards | Christian Aliverti / Renate Behrens | Riga | May 23rd 2016

25

RDA

- With every update more complex?
- RDA community is a community of librariens
- No higher-level organisational structure for cultural institutions in the German-speaking countries

GND

- Well developed and organisational structure.
- Further institutions can be integrated.
- Using authority data brings a direct benefit for practical work.
- Rules for authority data are well worked out in RDA and relatively stable.
