

RDA and NUKAT

Leszek Śnieżko
in cooperation with
Agnieszka Kasprzyk

Open Seminar: RDA in the Baltic & Eastern Europe
Riga, 23.05.2016

A few words about NUKAT

- NUKAT was designed and established by the representatives of Polish academic and research libraries and has been financed with A.W. Mellon Foundation grant (initially) and the subsidy of Polish Ministry of Science and Higher Education
- NUKAT is a source of downloadable bibliographic and authority data and centralized information on Polish research library holdings
- One of the most important features of NUKAT database is the Union Authority File and its mirror copies supported with several integrated library systems used by NUKAT member libraries

At the moment (May 2016) 141 cooperating libraries (of universities, research institutes and museums as well as public, pedagogical and church libraries)

- Records:
BIB: **3 340 374** AUTH: **5 138 538**
- Average daily input: **1200 bib records and 1000 authority records**
- Member library symbols showing the location of titles (fields 9XX): **nearly 13 mln**
- Nearly all types of documents (except for manuscripts and archival objects)
- 11 cooperating ILS
- Presence in the international data flow (VIAF, WorldCat)

NUKAT Center of Warsaw University Library

- **Bibliographic Data Control**

Control of new bibliographic records added to the database and modifications of those records in the database.

- **Authority Data Control**

Control of new and modified authority records (names, series titles, uniform titles, Author. Title headings, KABA subject headings)

- **IT Support**

Database management, supervision of the hardware, software and network.

- **Coordination & Cooperation**

Control of the NUKAT data flow and database integrity.
Contact with system librarians from member libraries.
Instruction, workshops, conferences.

NUKAT and RDA

- NUKAT Center has been following the development of RDA since 2010
- One of most important factors driving NUKAT interest in RDA was the lack of a document which would provide a complete set of cataloging rules for all types of resources

Andrzej Drożdż, Marek Stachyra

**FORMAT MARC 21
REKORDU BIBLIOGRAFICZNEGO
DLA DOKUMENTU ELEKTRONICZNEGO**

- Our goal: implementation consistent with scenario 1
- A comprehensive implementation of RDA is beyond our financial and staff capabilities
- Second option: an alignment of our cataloging rules with RDA

- We were looking for solutions that would allow us to avoid laborious and time-consuming modifications in our database and at the same time would make our data actionable.
- Extensive use of uniform titles and recording of relations among entities should enable us at least to approach the effects anticipated in the scenario 1.

Main tasks:

- the population of authority records with additional/new MARC fields e.g. 046, 37X-38X;
- replacing of GMD with fields 336, 337, 338.

OPAC1

Nationwide cooperation

**BIBLIOTEKA
NARODOWA**

- 2005-2008 - National Library member of NUKAT
- Could RDA be a factor in re-establishing this cooperation?
- April 2015 - presentation of the project „Descriptors of National Library”

- The main objective of this project is the modification of subject cataloging rules but it also affects the descriptive cataloging and functioning of authority files.
- This meant that NUKAT Center had to reconsider its plans.

What we have managed to do so far:

- the abolition of the rule of three;
- the translation of vocabulary to be used in fields 33X (but eventually we will use the translation made by National Library);
- later in this year we will implement new fields in authority records (we want to accompany this with the addition of VIAF and ISNI identifiers).

What we can expect in the future?

- The extension of the cooperation with the National Library.
- Further productive cooperation with the EURIG.

The most important success is
the achievement of general
consensus on the need for new
cataloging rules.

Thank you for your attention!
