[12 pp.]

Factory «VIZMA» offers you its production — rubber pneumatic toys. Such toys are very hygienic and it is easy to keep them clean.

The rubber pneumatic toys are intended for pre-school children as well as for little ones, because the toys are very soft.

Another kind of pneumatic toys is for juveniles. These toys are used for bathing, at the seaside, and to master the swimming habits. (The use in deep water is not recommended).

The toys are made of foodstuff rubber and painted with the dyes, which are harmless for children's health.

The rubber toys should be regularly washed in warm soapy water and rinsed in running water.
