

**Nordplus GBS Riga Workshop**  
**Creating corpora and text mining in digital libraries**  
**October 28 National Library of Latvia**

Topics in presentations:

- examples of digital research projects, especially done with texts in humanities or social sciences;
- examples of research questions that can be answered with the help of digital methods;
- technical side of these projects, how the data was prepared, what kind of tools were used;
- demonstrations of tools / prototypes you have developed;
- What are you planning to do next, what kind of text mining services would you like to see in your library.

<b>OCTOBER 28</b> <a href="https://zoom.us/j/94700653270">https://zoom.us/j/94700653270</a>	
<b>Theory</b>
